System requirements

Cameo Collaborator for Teamwork Cloud is a web-based product and supports the latest versions of the following browsers:

* Microsoft Edge
* Chrome
* Firefox
* Safari
* Internet Explorer 11.x and later versions

System requirements for small and medium deployments

Small and medium deployments are deployments where 5, 10, 25, or 50 connection licenses are used.

System requirements:

* 16 GB of RAM devoted exclusively to Cameo Collaborator for Teamwork Cloud
* 100 GB of free space on the disk, preferably SSD
* CPU with 8 cores running at 2.1 GHz
* Windows 2012 R2, Windows 2016, or Linux (RedHat/CentOS 7) 64 bit

System requirements for large enterprise deployments

Large enterprise deployments are deployments where 75 or 100 connection licenses, or unlimited licenses are used.

System requirements for deployments using 75 or 100 connection licenses:

* 32 GB of RAM devoted exclusively to Cameo Collaborator for Teamwork Cloud
* 200 GB of free space on the disk, preferably SSD
* CPU with 16 cores running at 2.1 GHz
* Windows 2012 R2, Windows 2016, or Linux (RedHat/CentOS 7) 64 bit

---

⚠️ **Deployments with unlimited licenses**

If you have a deployment with an unlimited license or are in doubt about what hardware to use, contact your account executive for hardware recommendations to accommodate your specific needs.
