# **Project Status Application Wizard**

The **Project Status Application Wizard** is used to apply the DLOD Milestone, DOTMLPF Milestone, or custom Milestone type to the selected element, which can be one of the following milestone kinds:

- In Service
- Deployed
- No Longer Used
- Out Of Service
- Other

To open the Project Status Application Wizard

1. On the diagram pane, right-click the Milestone and select Edit Status. The Project Status Application Wizard opens.

The wizard consists of two steps:

- 1 Actual Project Milestone Type selection
- 2 Project Status at a particular Milestone specification

## **Actual Project Milestone Type selection**

In this step, select DLOD Milestone, DOTMLPF Milestone, or create your own Milestone type.

Project Status Application Wizard				
Select the existing or create a new Actual Project Milestone type. Selected milestone type defines project threads and status indicators for each of the project treads for specifying project status at a particular milestone.				
<ul> <li>I. Select Actual Project Milestone Type</li> <li>2. Specify Project Status at a particular Milestone</li> </ul>	Q-         List         DLOD Milestone         ✓ DOTMLPF Milestone	Selected elements: <i>I</i>		
< Back Next > Finish Cancel				

## Project Status at a particular Milestone specification

In this step, specify project threads and status indicators of the selected Actual Project Milestone Type.

## 🔯 Project Status Application Wizard

#### Specify Project Status at a particular milestone To define Project Status at the particular Actual Project Milestone, select or create a new project thread and define its status indicator. Each project thread is defined by a different sector and each status indicator is defined by a different color in the project status circle. Project Thread Preview 1. Specify Project Status Organization at a particular Milestone Personnel Training Leadership Materiel Leadership Facilities Personnel Facilities Materiel Status Indicators Doctrine 📄 Add 🍵 Delete 🧄 Fill Color Training<sup>1</sup> Materiel Solution Analysis Technology Development Corganization Engineering and Manufacturing Dev Production & Deployment Operations & Support 窗 < Back Next > Finish Cancel

х

	Project threads	Status indicators
DOTMLPF Milestone type	<ul> <li>Doctrine</li> <li>Organization</li> <li>Training</li> <li>Materiel</li> <li>Leadership</li> <li>Personnel</li> <li>Facilities</li> </ul>	<ul> <li>Materiel Solution Analysis</li> <li>Technology Development</li> <li>Engineering and Manufacturing Development</li> <li>Production &amp; Deployment</li> <li>Operations &amp; Support</li> </ul>

If you selected your own milestone type, you can create your own projects threads and status indicators.

To create project threads and status indicators

- 1. In the Project Thread area, click the Add button.
- 2. Specify the thread name.
- 3. In the Status Indicator area, click the Add button. 4. Specify the indicator name.
- 5. Click the Fill Color button.
- 6. In the Color dialog choose the color and click OK.

Ocreate a second thread with the same status indicators, select a previously created thread and click the Clone button. A new thread with previously

defined status indicators is created.

To remove the applied Project Status

- **(**)
  - In the right bottom corner of the Preview area, click
