

Building NSV-5 matrix

The Systems to Systems Matrix (NSV-3) shows how resources interact with each other directly or using the [implied relations](#).

The rows of the NSV-5 matrix represent Functions and the columns represent Operational Activities.

To build a NSV-5 matrix

1. Specify the **Row Scope** (Functions).
2. Specify the **Column Scope** (Operational Activities).
3. Click the **Rebuild** button.

Functions implements Operational Activities using the **Implements** relationship.

To map a Function to an Operational Activity

- Click the intersection between the desired elements.

Click the intersection again and the relation will be deleted.
