

# NCV-5 Capability to Organisational Deployment Mapping

## Description

The NCV-5 defines Capability to Organisational Deployment Mapping. It addresses the fulfillment of capability requirements, in particular by network enabled capabilities. The NCV-5 View is used to support the capability management process and, in particular, assist the planning of fielding.

## Implementation

NCV-5 can be represented using:

- A NCV-5 table.

If your project has migrated from any earlier than 17.0.1 version, the old NCV-5 View representation based on the UML Class diagram is loaded as the NCV-2 Capability Taxonomy diagram.

- A NCV-5 spreadsheet report.

## Sample

	Hire new MRT Drivers	Hire new MRT Pilots	Plan training tasks for new employees	Perform training tasks
Maritime Rescue Team expansion (From 2011-01-01 To 2011-03-31)				
HR Manager	ERP	ERP	ERP	
Jr HR Manager	ERP	ERP	PM Software	
Qualified Helo Pilot				MRT Pilot
Qualified Lifeboat Driver				Helicopter
				MRT Driver
				Boat

NCV-5 Capability to Organization Deployment Mapping

Icon	View	Relationship
	NCV-1 Capability Vision	Capability Phasing is defined in NCV-1.
	NCV-2 Capability Taxonomy	Capabilities shown in NCV-5 table are usually modeled in NCV-2 Capability Taxonomy.
	NPV-2 Programme to Capability Mapping	The timing is based on project milestones from NPV1 which indicate when capability configuration will be delivered to an organization.
	NOV-4 Organizational Relationships Chart	Actual Organizational Resources related to deployment of Capability Configurations are taken from NOV-4 Organizational Relationships Chart.
