# **Collaboration Use**

A Collaboration Use represents the implementation of a pattern described by a Collaboration in a specific situation. In this context, role binding means that the roles in the Collaboration are bound by concrete elements. A Collaboration can be used many times in different Collaboration Uses.

Example of multiple Collaboration Uses along with Parts

### **Model Tip**

These instructions will work best if you have a Composite Structure diagram created already.

To assign a collaboration to a collaboration use

Before assigning a Collaboration to a Collaboration Use, you **must** have a Collaboration created in your model.

#### Collaboration

Read Collaboration on how to create a Collaboration in your model.

After creating a Collaboration, then do one of the following:

• On the Composite Structure diagram palette, click the Collaboration Use button

Collaboration Use , and then in the opened dialog, select an existing Collaboration or click Creation Mode button to create a new Collaboration. Click **OK** when

On the Composite Structure diagram pane, create a Collaboration Use, then click the

Collaboration Use shape, and then on the smart manipulator toolbar, click the symbol. Select a Collaboration. Press **Enter** or click anywhere on the diagram pane. The Collaboration is now created and assigned.

- On the Composite Structure diagram pane, create a Collaboration Use, then click the
  Collaboration Use shape, and then press Ctrl+T. Type the name of the new Collaboration and
  press Enter, or click anywhere on the diagram pane. The Collaboration is now created and
  assigned.
- On the Composite Structure diagram pane, create a Collaboration Use, then click the
  Collaboration Use shape, after that click the name area. Type the ":" colon and then type the
  Collaboration name. Press Enter, or click anywhere on the diagram pane. The Collaboration is
  now created and assigned.
- In the Containment tree, select the Collaboration and drag and drop it on the diagram pane. A
  Collaboration Use with the assigned Collaboration is created.
- On the Composite Structure diagram pane, open the Specification window of the Collaboration
  Use and click the cell of the Type property value. In the opened dialog, click
  "", and select the
  Collaboration. Click OK when you are done.

## Collaboration use properties

You can format Collaboration Use symbol properties in the Symbol Properties dialog.

## **Formatting Symbols**

For more information about symbol representation properties, see Formatting symbols.
