

# Specifying criteria, layout, and depth

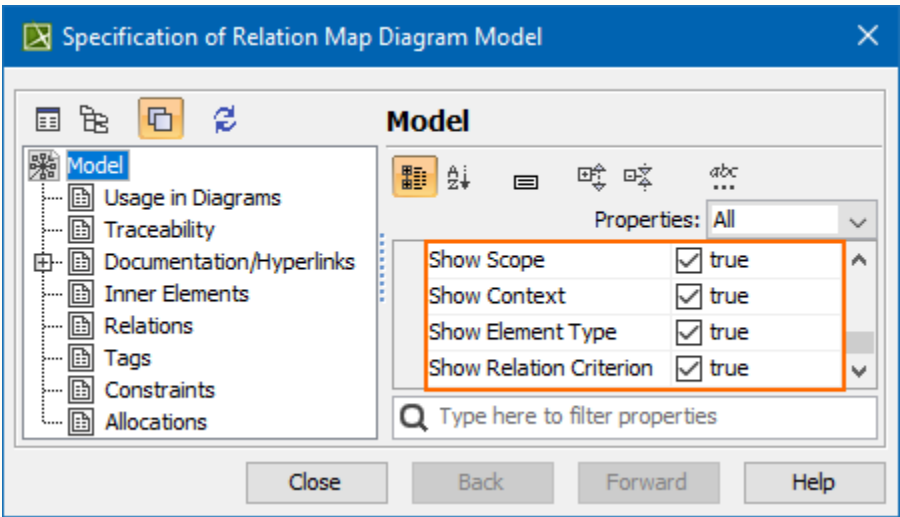

After creating a relation map, you need to specify criteria, layout, and depth for it.

To change the relation map properties

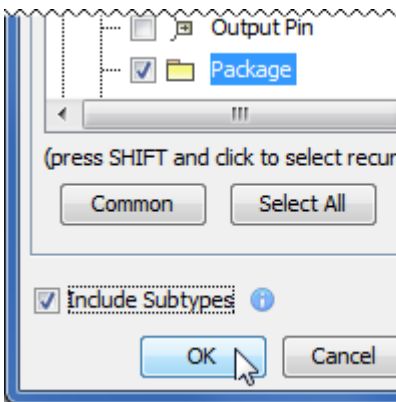

- Right-click the diagram pane and from shortcut menu, select **Specification**, or click  on the Options toolbar and then select **Specification**. Change the property values in the Specification window of the relation map.
- Specify the most popular property values by using the relation map environment capabilities, such as toolbars and the **Criteria** area.

 You can choose whether you want to show or hide Context, Relation Criteria, Element Type, and/or Scope. In the Relation Map **Specification** window, set the needed check-box to true or false.

Element name	Element type	Description
Context	Text box with 	Click to select the main element from which to <a href="#">change the context</a> .
Relation Criteria	Text box with 	Click to select relation criteria that will be displayed. You can select to <a href="#">show implied relationships</a> the model element in order to provide additional information.

<p>Element Type</p>	<p>Text box with</p> 	<p>Click to select element types that will be displayed on the relation map. For example, if you want to select standard and custom subtypes of the Package, select the Package, and other custom subtypes of the Package, select the Package.</p> 
<p>Scope</p>	<p>Text box with</p> 	<p>Click to select packages from which the relation map will be generated.</p>

The screenshot shows a software interface with a top toolbar containing a gear icon and a magnifying glass icon. A context menu is open, displaying the following options: 'Make Element as Context on Selection', 'Cut Element Names', 'Show Single Node Per Element', 'Show Applied Stereotypes', 'Show Element Numbers', 'Show Parameters', 'Show Full Types', 'Layout', 'Specification', and 'Enter'. The 'Layout' option is highlighted in yellow and includes a right-pointing arrow. To the right of the menu, a 'Tree' view is visible with a checked checkbox and the label 'Radial'.

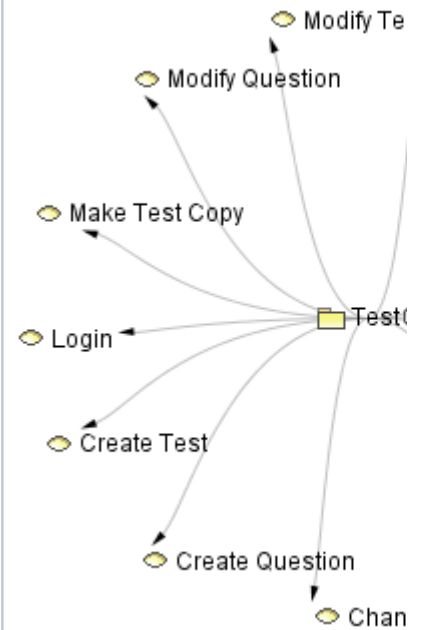

Command  
on the  
Options  
button  
menu

Select a the relation map layout:

- Tree.

- Radial.
