## Displaying and navigating through changes

You can customize the content of the **Merged Result** tree/list as well as navigate through changes in both the **Merged Results** tree/list and the **Specificati** on panel using the toolbar that is located at the top of the **Merge** window.

The toolbar buttons for customizing the Merged Results tree/list and navigating through changes are described in the following tables.

| Button /<br>Shortcut<br>keys  | Tooltip text   | Description   |
|-------------------------------|--|---|
| <b>P</b>                      | Accept the selected change and go to the next change   | Click to accept the selected element change and go to the next change (might be a property or the element).   |
| <b>2</b>                      | Accept the selected change, its property changes and go to next change                         | Click to accept the selected element change together with the element property changes and go to the next changed element.  |
| <b>\$</b>                     | Accept the selected change, its property changes, all subelement changes and go to next change | Click to accept all changes from both contributors starting from the selected element and go to the next changed element (which is not a subelement). For example, if the root package <i>Model</i> selected, then all changes for the whole project will be accepted.    |
| X.                            | Reject the selected change and go to the next change   | Click to reject the selected element change and go to the next change (might be a property or the element).   |
| <u>x</u>                      | Reject the selected change, its property changes and go to next change                         | Click to reject the selected element change together with the element property changes and go to the next changed element.  |
| X.                            | Reject the selected change, its property changes, all subelement changes and go to next change | Click to reject all changes from both contributors starting from the selected element and go to the next changed element (which is not a subelement). For example, if the root package <i>Model</i> is selected, then all changes for the whole project will be rejected. |
| ♦                             | Go To First Change   | Click to select the first change.   |
| Alt + Home                    |  | The button is not available if the first change is already selected.  |
| <b>☆</b><br>Alt + Up<br>arrow | Go To Previous Change  | Click to select the previous change.  |
| Alt + Down arrow              | Go To Next Change  | Click to select the next change.  |
| <b></b><br>Alt + End          | Go To Last Change  | Click to select the last change. The button is not available if the last change is already selected.  |
| Alt + Page<br>Down            | Go To Next Conflict  | Click to select the next conflict. The button is not available if there are no conflicts.   |
| 器                             | Annotate Merged Diagram  | Click to turn on showing merged diagram annotations.  |
| ₹ .                           | Report   | Click to generate a Project Merge differences report in Microsoft Word format.  |
| Options me                    | enu  |   |
| Icon                          | Option   | Description   |
| <b>*</b> > 7                  | Filter   | Click to open the <b>Select Element Type</b> dialog. Clear the checkbox next to an element that you want to hide in the <b>Merged Result</b> tree/list.   |
| <b>*</b>                      | Show Auxiliary Resources   | Click to show or hide in the <b>Merged Result</b> tree the profiles with the «auxiliaryResources» stereotype applied (for example, UML Standard Profile).   |

| Click to show or hide in the <b>Merged Result</b> tree/list the elements from used projects.   |
|--|
| Click to show or hide <b>Source column</b> in the <b>Specification</b> panel. By default, this column is shown.  |
