

UML model properties names

Constants for UML model properties names are defined in several classes.

Use [com.nomagic.uml2.impl.PropertyNames](#) for standart UML metamodel property names.

Use [com.nomagic.uml2.impl.PrivatePropertyNames](#) for auto-generated opposite property names.

The events' names related with model creation/ deletion are listed in the [com.nomagic.uml2.ext.jmi.UML2MetamodelConstants](#) class.
