

Do Not Suggest As Type

Excludes elements from being suggested as a type in the list dialogs.

To exclude a DSL element from the list dialogs

1. In the **Customization** [Specification window](#) , click the **Customization Target** property.
2. Click the  button. The element [Selection](#) dialog appears.
3. Select a stereotype or a metaclass.
4. Click **OK** to close the dialog.
5. Set the **Hide Metatype** property to *true* .
6. Set the **Do Not Suggest As Type** property to *true*.
7. Click Close.
8. Reopen the project. Elements or metaclasses selected in the third step of this procedure are not listed in the list dialogs. For example, in the **Property** [Specification window](#), click the **Type** property and then the  button. In the element [Selection](#) dialog, the elements or metaclasses selected as **customization targets** will not be displayed.
