

Viewing and editing resource details

On this page

- [Viewing resource details](#)
- [Editing resource details](#)

Viewing resource details

In the Resources app you can view the following resource information:

- Resource details, including the resource name, creation and last modification dates, and the user who has created or modified the resource.
- Resource history information, including the user who created each version of the resource, the version creation date, and the type of changes that were made.
- The roles assigned to the resource.

To view resource details

-
1. [Open the Resources app](#) and go to the category where the relevant resource is located.
 2. Click  next to the resource, the details of which you want to view.
 3. From the menu, select **View resource details**.

Resource details, such as category, creation date, and last modification date, are shown on the **Resource** pane on the right side of the screen.

Important

- To edit resource details in the **Resource** pane, click **Edit** on the bottom of the pane. To remove the resource - click **Remove**.
- If you are the Administrator user, simply click a resource to view its details.

Editing resource details

You can edit a resource name and description or move the resource to another category as described below.

To edit resource details

1. Open the [Resources app](#) and go to the category where the relevant resource is located.
2. Click next to the resource, the details of which you want to edit.
3. On the **Edit resource details** pane, do one or several of the following actions:
 - Change resource name in the **Resource name** field.
 - Change resource category in the **Category** field to move the resource to another category.
 - Change or add resource description in the **Description** field.
4. Click on top right corner of the **Edit resource details** pane.

When you get a confirmation message, it means the resource details are successfully updated.
