## Image synchronization from DOORS Next Generation

DataHub 19.0 SP2 now enables you to synchronize property values containing embedded images from DOORS Next Generation to DataHub. [Learn how to synchronize images from DOORS to DataHub 19.0 SP2 >>](#)

Synchronizing the image in a Requirement from DOORS Next Generation to DataHub.

The Save HTML images from DOORS NG in the projects as attached files option in Environment Options dialog.

## Cleanup for unused DHLinks

Utilized for a period of time, DataHub contains some DHLinks left unused in the database where their referenced objects are not available. For more productive performance, DataHub has come equipped with the capability of detecting and removing them. Another indirect usage is that you can deploy this function when splitting parts of a synchronized model as the used project.
