Working with Data Sources

Before connecting a Data Source to a driver, you need to have the **DataHub Explorer** tab open in MagicDraw[®].

To open DataHub Explorer

- 1. Start MagicDraw[®] and create a new project or open an existing one.
- 2. From the MagicDraw[®] main menu, click **Tools** > **DataHub** > **DataHub Explorer**. The **DataHub Explorer** tab opens.
