# Editing an equivalent property
To edit an equivalent property

1. Right-click on an equivalent property, e.g. "*has father*", in the diagram pane.

2. Select **Concept Modeling** > **Edit equivalent properties**. The **Specification of Property has father** window will open showing the equivalent properties under the section **Tags**.

The Specification window of Property has father.

3. Click the tagged value, e.g. **equivalent to = has dad, has papa**.

4. Click **Edit Value**. The **Specification of Slot < >** window will open.

The Specification window of Slot <>.

5. Click **Value** and click the properties box next to it.
6. You can click:

   ⊞ to add another equivalent property.

   ⊟ to delete a selected equivalent property.

   ⇅ to order the equivalent properties in the **Order Value** dialog.
