Removing resources

You can remove any type of resources from the Resources app as described below.

To remove a resource

1. Open the Resources app and go the category where the relevant resource is located.
2. Click ⋮ next to the resource you want to remove.
3. From the menu, select **Remove resource**.
4. When you get the message asking if you want to remove the resource, click **Remove**.

When you get a confirmation message, it means the resource is successfully removed.
