Viewing user role assignment

The **Roles** card provides information about the role (along with the scope) assigned to the user. User can see assign roles and resources, by clicking **Change** button. The **Change roles** pane lists all assigned roles of the user with scope and resources lists. Here you can also change roles assignments.

To assign a role to an existing user/group

1. On the **Users application**, click a username to whom you want to assign a role. The **User** pane will open.
2. Go to the **Roles** card, and click **Change** button. The **Change roles** pane opens.
3. Select to **Add roles** and in the search box start typing role name. Select role from appeared list.
4. Do on of the following:

    - For custom role: set scope and resources and click the **Save** button, to save the changes.
    - For predefined role: click the **Save** button, to save the changes.
