

Import the license key to the FlexNet license server

Import the license key to the FlexNet license server:

1. In the FlexNet License Administrator's webpage, click **Vendor Daemon Configuration** on the left.
2. Click **Import License** and select the received license key file.
3. Click the **Import License** button.

If you want to re-import the license key file, select the **Overwrite License File on License Server** check box.

The screenshot shows the 'Import License File' dialog box in the FlexNet License Administrator. On the left is a vertical sidebar with five icons and labels: 'System Information' (gears), 'User Configuration' (person icon), 'Alert Configuration' (warning triangle), 'Server Configuration' (gears), and 'Vendor Daemon Configuration' (key icon). The 'Vendor Daemon Configuration' option is highlighted in blue. The main area of the dialog is titled 'Import License File' and contains the following elements: a section 'License File from Your Local Machine:' with a 'Browse...' button and the text 'FLEXnet License Server key.txt'; a checked checkbox labeled 'Overwrite License File on License Server'; and two buttons at the bottom, 'Import License' and 'Cancel'. A mouse cursor is pointing at the 'Import License' button.
