

License management

This chapter explains how to activate and/or update the license required to access and use Magic Collaboration Studio features. Magic Collaboration Studio uses the FlexNet License server to manage its licenses. So before applying a license to the product, follow these steps:

1. [Install and start the FlexNet license server.](#)
2. [Check if the FlexNet server is running.](#)
3. [Add the Magic Collaboration Studio license to the FlexNet server.](#)

Once you install the FlexNet License server and import the license key, see the following topics which will help you to apply or change the license:

- [Applying a license](#)
- [Changing a license](#)
