

Synchronizing data

You can synchronize data from the **DataHub** menu in DOORS. DataHub synchronizes data and updates all pending changes from the DOORS side.

To synchronize data from the **DataHub** menu in DOORS, do one of the following

- On the DOORS main menu, click **DataHub > Synchronize** to synchronize and update all pending changes.
- Right-click an object in the DOORS formal module and select **Synchronize**.

Note

- The **Synchronize New Node** dialog does not appear when you click **Synchronize**.
