

# Properties tab

The **Properties** tab at the bottom of the Model Browser allows you to quickly access basic information about a selected element or diagram.

An example of the Properties tab in the Quick properties panel

✔

Multiple selection

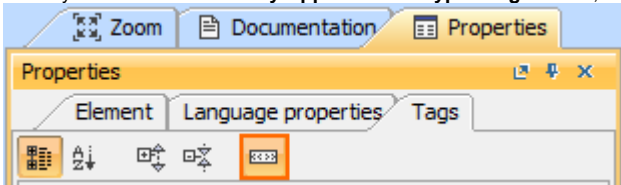

- If multiple elements or symbols of different kinds are selected, only their common properties are displayed in the **Properties** tab.
- If more than 10 elements in the Containment tree or symbols on the diagram pane are selected, properties are displayed only by request. You need to click the link **Show common properties for the selected items**.

To open the **Properties** tab, do one of the following

- In the Model Browser, click the **Properties** tab.
- On the **Window** menu, click **Properties**.

The **Properties** tab includes the following tabs:

Tab name	Description
Element	Contains the main properties of the element's or diagram's specification.
Symbol	Contains the element symbol's properties. <div><div><div>⚠</div><div>This tab is available for symbols only.</div></div></div>

<b>Tags</b>	<p>Contains the tagged values of the selected element.</p> <p>When you click the <b>Show Only Applied Stereotypes Tags</b> button, only the tabs with values are listed.</p>  <p>The screenshot shows the 'Properties' window with three tabs: 'Element', 'Language properties', and 'Tags'. The 'Tags' tab is selected and highlighted. Below the tabs, there are several icons, and the one representing a list or table (the 'Tags' icon) is highlighted with an orange box.</p>
<b>Language properties</b>	<p>Contains the same data as the <b>Language Properties</b> property group in the element's <b>Specification</b> window.</p> <div data-bbox="354 457 1346 571"> <p> This tab is available only for the elements used for code generation, that is, class, attribute, operation.</p> </div>
<b>Traceability</b>	<p>Contains the same data as the <b>Traceability</b> property group in the element's <b>Specification</b> window.</p>
