

Creating SvcV-2 diagram

You can create an SvcV-2 just before finishing an [OV-2](#) or in later stages of the architecture just before finishing the [SV-1](#) or [SV-2](#) views.

To create a SvcV-2 diagram

1. Create Service Specifications and Service Ports.
2. Associate Service Specifications using Associations.
3. Associate Service Ports using Service Connectors.

You can proceed to create [SvcV-4](#) view as soon as the SvcV-2 has been completed.

You can model internal structure of each Service Specification directly in the compartment area of this element shape or using the [SvcV-2 Service Resource Flow Internal Description](#) diagram.
