

Projects Roadmap

Description

The Projects Roadmap (Pj-Rm) domain shows the product portfolio management; a planning of capability delivery. It provides a timeline perspective on programs or projects. This domain is not limited to the acquisition and fielding processes.

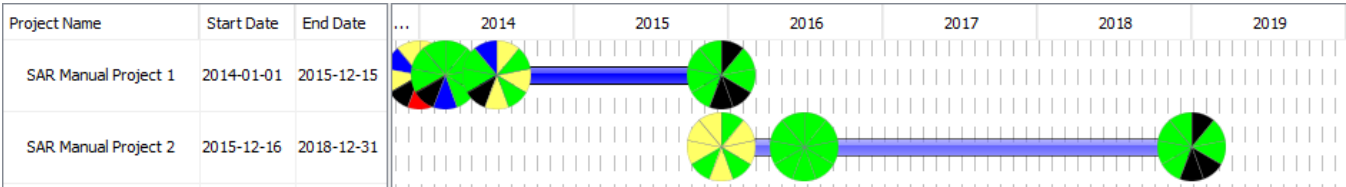

The intended usage of the the Projects Roadmap (Pj-Rm) domain includes:

- Project management and control (including delivery timescales).
- Project dependency risk identification.
- Management of dependencies.
- Portfolio management.

Implementation

The Projects Roadmap (Pj-Rm) domain is represented by a [Project Roadmap diagram](#) which is realized as a Gantt Chart.
