

Building the S4 Services to Operational Activities Mapping matrix

Services to Operational Activities Mapping matrix describes the directly or using the [implied relations](#) mapping between the Service Specifications and Operational Activities. The rows of this matrix represent Operational Activities and the columns represent Service Specifications.

To create S4 matrix

1. Specify the **Row Scope** (Operational Activities).
2. Specify the **Column Scope** (Service Specifications).
3. Click the **Rebuild** button.

Operational Activities maps to Service Specifications using the Consumes relationship.

To map an Operational Activity to a Service Specification

1. Double-click an empty intersection.

To remove the relation

1. Double-click a full intersection between the desired elements.
