Procedures

Find out the common actions that are usually performed when using tables, matrices, and libraries, or handling the output information, described in the following sections:

- Creating Blank UPDM Project
- Managing Project Properties
- Converting Model between Enterprise Architecture Frameworks
- Applying military symbols
- Creating Desired Effects
- Dragging and Dropping
- Exporting to PES
- Filtering Operational Activities and Functions
- Managing Reports
- Inheritance, Aggregation, Composition, and Redefinition of Exchanges
- Instantiating Structures
- Managing Measurement Sets and Actual Measurements
- Managing Tables
- Managing Traceability and Impact Analysis
- Using Libraries
- Using SysML Compliance Mode
- Using Expand/Collapse Internal Structure Compartment
- Coverage Analysis
- Implementation Matrix
- Service Channels Summary Table
- Service Channels Summary Matrix
