Creating P1 Technology Forecast table

To create a P1 Technology Forecast table

1. Add Rows to the table by doing any of the following:
    - Adding a new Resource as the row Header: click the **Add New** button, select a Resource you want to create, and specify the owner of the selected Resource.
    - Adding an Existing Resource as the row Header: click the **Add Existing** button and select one or more existing Resources.
2. Add columns to the table by clicking the Time Periods button. The **Time Periods** dialog opens. Specify the forecast time periods:
    - Select or create a Timeline package to store the Forecast dates.
    - Select a Forecast Kind.
    - Specify additional options needed according to the selected Forecast Kind.
3. Click the **…** button on the cell to select the Resources, Standards, Protocols or Competencies to forecast, and then specify the date for the Forecast.

> ⓘ By default the date will be the starting date of the selected time period.
