

Smart package properties

Every smart package has several properties that allow you to specify the contents of the smart package. These properties are described in the following table.

Property	Description
Query	<p>Stores a set of criteria for automatic inclusion of elements into the contents of the smart package.</p> <p>For more information, see Including elements into a smart package automatically.</p>
Additional Elements	<p>Stores the list of the elements manually included into the contents of the smart package.</p> <p>For more information, see Including elements into a smart package manually.</p>
Excluded Elements	<p>Stores the list of the elements excluded from the contents of the smart package.</p> <p>For more information, see Removing elements from a smart package.</p>
