

Specifying criteria, layout, and depth

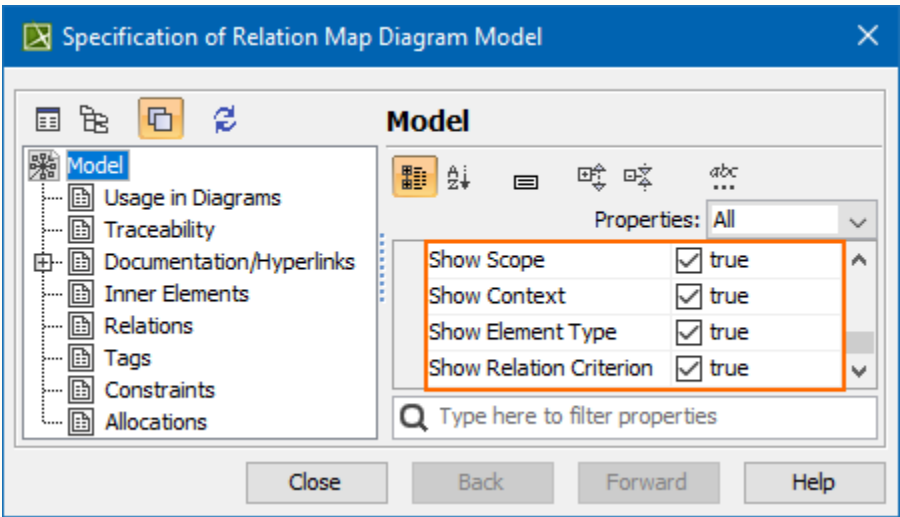

After creating a relation map, you need to specify criteria, layout, and depth for it.

To change the relation map properties

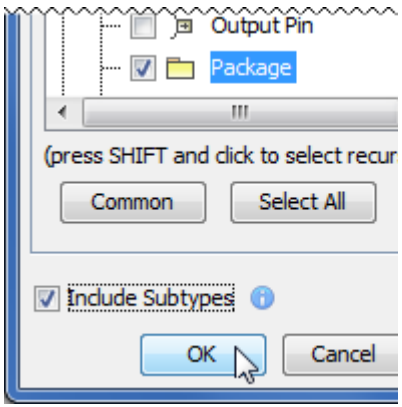

- Right-click the diagram pane and from shortcut menu, select **Specification**, or click  on the Options toolbar and then select **Specification**. Change the property values in the Specification window of the relation map.
- Specify the most popular property values by using the relation map environment capabilities, such as toolbars and the **Criteria** area.

 You can choose whether you want to show or hide Context, Relation Criteria, Element Type, and/or Scope. In the Relation Map **Specification** window, set the needed check-box to true or false.

Element name	Element type	Description
Context	Text box with 	Click to select the main element from which to change the context .
Relation Criteria	Text box with 	Click to select relation criteria that will be displayed. You can select to show implied relationships the model element in order to provide additional information.

<p>Element Type</p>	<p>Text box with</p> 	<p>Click to select element types that will be displayed on the relation map. For example, if you want to select standard and custom subtypes of the Package, select the Package, and other custom subtypes of the Package, select the Package.</p> 
<p>Scope</p>	<p>Text box with</p> 	<p>Click to select packages from which the relation map will be generated.</p>

	<p>Command on the Options button menu</p>	<p>Select a the relation map layout:</p> <ul style="list-style-type: none"> Tree.  <ul style="list-style-type: none"> Radial. 
<p>Depth</p> <p>Depth: 2</p>	<p>Spin box</p>	<p>Type or select the level of the relation map b</p>
