

# Creating nested parts by pasting items from the list

When you have a list of the items you want to create as parts in the diagram, you can copy the list and paste it in the Composite Structure Diagram diagram pane.

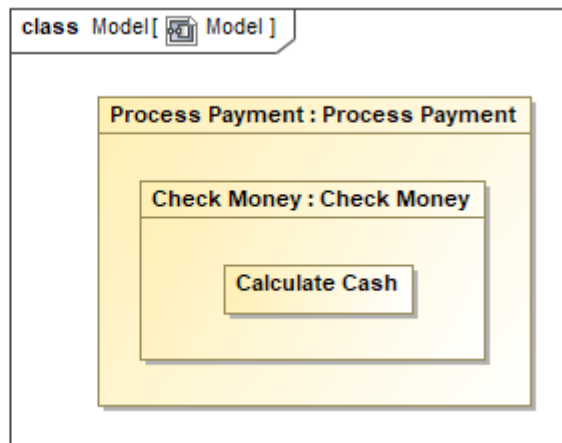

The list can be numbered, bullet, or indented. Depending on the list, nested parts can be created.

You can copy the list from the text editor (Word, Notepad, etc.), web page, PDF file, etc.

To create parts by pasting items from the list

1. Copy the list.
2. Go to the diagram and press Ctrl+V.
3. In the open menu, select **Element**.
4. Select the Part.
5. In the question dialog click **Yes** if you need to create nested parts.

1. Process Payment  
1.1. Check Money  
1.1.1. Calculate Cash

The nested parts are created according to the copied list
