

Single Sign-On Authentication

The Single Sign-On (SSO) property is available to log on to a Teamwork Cloud server (TWC). For now, you can log using SAML authentication (e.g., ForgeRock, Ping, WSO2). And for you it means:

- No need to remember and type credentials each time you logging to a server.
- No issues about weak passwords and updating it.

The screenshot shows the Teamwork Cloud login page. At the top left is the Teamwork Cloud logo, which consists of a blue cube with a network diagram inside. To the right of the logo is the text "Teamwork Cloud". Below the logo, there is a "Username" field with the text "john" entered. Below that is a "Password" field with a masked password "*****". A red "SIGN IN" button is positioned below the password field. Below the "SIGN IN" button is a horizontal line with the text "Or sign in with" in the center. Below this line are two blue buttons: "SAML USER" and "CERTIFICATE". At the bottom of the page, there is a small copyright notice: "© 2017 No Magic, Inc. All rights reserved."

Logging to TWC using SSO.

SSO implementation is based on the [JxBrowser platform](#), and is supported by following OS:

- **Windows (32-bit & 64-bit)**
 - Windows 10
 - Windows 8 & 8.1
 - Windows 7
 - Windows Server 2008 R2
 - Windows Server 2012
 - Windows Server 2016
- **Linux (32-bit & 64-bit)**
 - Ubuntu 12.04+
 - Debian 7.7+
 - Fedora 20
 - openSUSE 13.1
 - RedHat Enterprise Linux 7
- **macOS (64-bit)**
 - macOS 10.9.x - 10.12.x (Intel)

For more information about supported OS, please refer to [JxBrowser system requirements](#).
