   Select Excel/CSV file area

  - Sync Options area
  - Mapping Options area
  - Mapping area

The Excel/CSV Sync Options dialog allows you to specify settings before syncing data between an Excel/CSV file and a table. You can select files for syncing and define syncing and mapping options in this dialog.

# **Opening the Excel/CSV Sync Options dialog**

To open the Excel/CSV Sync Options dialog

• In the table toolbar, click I and do one of the following: - Select the Sync Options command.

- Select the Excel/CSV File > Select File. Click the Details button on the left bottom corner of the dialog.

The Excel/CSV Sync Options dialog opens.

## Description of the Excel/CSV Sync Options dialog areas

The Excel/CSV Sync Options dialog consists of the following areas:

- Select Excel/CSV file area
- Sync Options area
- Mapping Options area
- Mapping area

	X Excel/CSV Sync Options	×
	Set Excel/CSV sync options This tool allows you to specify settings before syncing content between an Excel/CSV file and a table. Select the Excel or CSV file to sync with the table. To define syncing or mapping options, click the Details button.	
Select Excel/CSV file area -	Select Excel/CSV file From file system From model Excel/CSV File: file://C:/Vehicle Stakeholder Requirements.xlsx	
Sync Options area-	Sync Options If rows in the file are deleted: Delete elements from the model v	Į
Mapping Options area-	Mapping Options         Sheet:       Sheet1         First cell:       A1         CSV delimiter:       ,         Image: First row contains headings	
Mapping area -	Table Columns       Drag columns from right or left to map       Excel/CSV Columns         Name       Name       Name (A1)       Documentation (B1)         Priority (C1)       Priority (C1)       Comments (D1)         Documentation

The main areas, highlighted in orange, in the Excel/CSV Sync Options dialog: select file, sync, mapping options, and mapping.

#### Select Excel/CSV file area

The Select Excel/CSV file area allows you to select the Excel or CSV file from your file system or from your model if the Excel or CSV file is attached to a project. How to attach the file to a project >

Button	Description
<sup>1</sup>	If you select <b>From file system</b> , opens the <b>Open</b> dialog. If you select <b>From model</b> , opens the <b>Select Excel/CSV file</b> dialog.
ø	Refreshes the mapping area after changing the file.

The Sync Options area contains one option that allows you to specify the sync mechanism behavior when importing data to a table if rows in your file are deleted. All available values are described below.

Sync option	Description
If rows in the file are deleted	• Delete elements from the model - deletes the same elements that were deleted in the file from your model.
	Reme elements are read-only in Excel file, they cannot be deleted from the model.
	<ul> <li>Remove elements form the table - removes the same elements that were deleted in the file only from the modeling tool table, not from the model.</li> <li>Mark as obsolete (default) - The table Legend automatically displays and highlights the removed elements (obsolete) in red.</li> </ul>

### **Mapping Options area**

The Mapping Options area allows you to specify mapping options. The following table lists all available options.

Mapping option	Description	
Sheet	Select the Excel file sheet you want to sync. The first sheet is selected by default. It is available only for Excel files.	
First cell	Select the Excel file cell you want to start syncing from. The first cell filled with data is read by default. If the selected sheet is empty, it reads from the A1 cell. It is available only for Excel files.	
CSV delimiter	Select the delimiter of the CSV file from the drop-down list. If you want to specify the custom delimiter in the next box, select <b>Other</b> . By default, the comma (,) is selected. It is available only for CSV files.          CSV delimiter:       , , , , , , , , , , , , , , , , , , ,	
First row contains headings check box	Clear the check box if your Excel/CSV file does not contain headings. The check box is selected by default.	

## Mapping area

The Mapping area allows you to manage mapping between modeling tool table columns and Excel/CSV table columns by creating new mappings, remapping, or deleting them:

- To create a new map or re-map one by one, drag columns from the left tree/right tree onto columns in the right tree/ left tree.
- To create a new map or re-map all columns in the ordinal position, click <sup>BB</sup> at the bottom of the mapping area.
- To delete mapping one by one, select an appropriate map and click  $\hat{\blacksquare}$  at the bottom of the mapping area.
- To delete all mappings, click at the bottom of the mapping area.

If you do not define your own mapping - that is, the mapping area is empty - the columns by default are mapped on the ordinal position.

 $igodoldsymbol{B}$  hashtag (#) column from the modeling tool table is not included in the mapping.
