## Adding property subsetting

To subset a property

1. Double-click on the property ("composed of" from "Futsal Team") that subsets another property ("consists of" from "Soccer Team"). Remember that the property is owned by the class at the opposite end of the association.

2. The specification dialog opens for this property.

Specification of Property composed of		
Specification of Property properties Specify properties of the selected Property in the properties specification table. Choose the Expert or All options from the Properties drop-down list to see more properties.

3. Locate and select the property that is subsetted in the Containment tree ("consists of" from "Soccer Team"), then press Alt+B.

4. Drag the property that is subsetted ("consists of" from "Soccer Team") from the **Containment** tree to the box next to "Subsetted Property" in the right pane of the **Specification** window for the subsetting property ("composed of" from "Futsal Team").

## 5. The property is subsetted.
