

# Uninstalling plugins

If you want to uninstall a plugin from a modeling tool, follow the steps described below.

To uninstall a plugin

---

1. Start a modeling tool.
2. In the **Help** menu, select **Resource/Plugin Manager**.
3. In the **Resource/Plugin Manager** dialog, select the plugin you want to uninstall.
4. Click the **Remove** button.
5. When you receive the message asking if you want to remove the plugin, click **OK**.
6. Restart the modeling tool.
