

Opening a resource

You can open a Teamwork Cloud resource as described below.

To open a resource

1. [Open the Resources app](#) and click the category where the relevant resource is located.

Using search bar

- Resources enables non case-sensitive keyword search.
- You can start typing a keyword in the Resource search bar to display all the resources that contain that keyword.

2. Click  next to the resource that you want to open.
3. From the menu, select **Open resource**.

ML/SysML models are opened in your modeling tool, and Cameo Collaborator documents are opened in [Cameo Collaborator for Teamwork Cloud](#). [OSLC resources](#) allow you to see the OSLC UI previews of model elements in the environment of a synchronized tool and they cannot be opened.
