

# Model editing in Cameo Collaborator

## On this page

- [Model editing to provide feedback](#)
- [Model editing to react to feedback](#)

You can edit certain model elements right in a Cameo Collaborator for Teamwork Cloud document. This is very beneficial for the whole product team, because engineers and even stakeholders can make changes to a model without having to use a modeling tool. In addition, the model editing capability speeds up the collaboration on a model. It allows you to instantly correct property values in a Cameo Collaborator document and skip the commenting process.

The sections below explain several main workflows the model editing feature can be used in.

## Model editing to provide feedback

If you need to review a Cameo Collaborator document and provide feedback on the model, follow the workflow below.

To provide feedback on a model

---

1. Open the Cameo Collaborator for Teamwork Cloud document you want to review.
2. Review the document, including its structure, element characteristics, and diagrams.
3. Do one or several of the following actions:
  - [Create textual or graphical comments](#) for items that need to be addressed.
  - [Edit element values](#) if you know what they should be.
4. Inform the author that you have finished reviewing the document so that he/she could react to your feedback.

## Model editing to react to feedback

When a reviewer provides feedback on a Cameo Collaborator document, address the comments right in the document without having to use a modeling tool.

To react to feedback

---

1. Open the Cameo Collaborator for Teamwork Cloud document that has comments you need to address.
2. In the app bar click  to open the [comments pane](#) and read the comments.
3. [Edit element values](#) in the document to address the reported issues.
4. [Reply to the comments](#) to inform the reviewer that required changes have been made or ask for additional information.
5. Inform the reviewer that you have finished updating the model and ask for another round of review.
