# MODAF. SV-5 Function to Operational Activity Traceability Matrix

### Description

The Function to Operational Activity Traceability Matrix (SV-5) addresses the linkage between functions described in an SV-4 and Operational Activities specified in an OV-5. The SV-5 View depicts the mapping of functions (and, optionally, the functional resources that provide them) to operational activities and thus identifies the transformation of an operational need into a purposeful action performed by a system or solution.

#### Implementation

SV-5 can be represented using a SV-5 diagram which is an editable Dependency Matrix. The Functions will be used as the row elements and the Operational Activities will be used as the column elements.

### Sample

	Find Victim	🔷 Monitor Health	🔷 Process Warning Order	🔷 Provide Medical Assistance	🔷 Receive Distress Signal	<li>Recover Victim</li>	🔷 Rescue	🔷 Search	🔷 Send Distress Signal	🔷 Send Warning Order	Transit To SAR Operation
∃ <mark>™</mark> SV-4	1			1	1	2			2		
\$ Apply First Aid				7							
	1								7		
	1										
					7						
- S Receive TDM											
- S Receive Track Information											
						7					
Ś Send Message									7		
S Transport						7
