

ASIL Decompose and DeriveReq Relationships

Constrained Element: Functional Safety Requirement, Technical Safety Requirement, Hardware Safety Requirement, Software Safety Requirement

Constrained Element Filter: Safety Requirements that have outgoing DeriveReq and ASIL Decompose relationships

Severity: error

Error Message: The ASIL value is incorrect due to ASIL Decompose and DeriveReq relationships.

Abbreviation: ASILDcmpDrv

Description: Safety Requirements (Functional Safety Requirement, Technical Safety Requirement, Hardware Safety Requirement, Software Safety Requirement) fail when the highest ASIL value defined by outgoing DeriveReq relationships is not equal to the ASIL value of the constrained element.
