

Version Information dialog

To open the Version Information dialog

1. Open the Project Versions dialog (see the procedure [Project Versions dialog](#))
2. Select a project and click **Properties**.

Element Name	Description
Version	The version number of a project.
Author	The login name of the author who created the project.
Date	The date and time the selected project version was committed.
Comment	Allow users to type optional descriptions about changes in the committed version. You can enter or edit comments for any project version.
Tags	Displays modules used in the selected project version.
Modules	Displays modules used in the selected project version.
Meta Information	Displays the project's information, such as required plugins and used modules.
