- Changing the Name Display Mode on the Call Behavior Action symbol

Description

The Call Behavior Action invokes a Behavior directly rather than invoking a behavioral feature that, in turn, causes the Behavior. The argument values of the Action are available to the execution of the invoked Behavior. The execution of the Call Behavior Action waits until the execution of the invoked Behavior is completed and a result is returned on its Output Pin. In particular, the invoked Behavior can be an Activity.

Assigning a Behavior to the Call Behavior Action

To assign a Behavior to the Call Behavior Action, do one of the following

- On the Activity diagram palette, click . An Activity will be created automatically on a Call Behavior Action creation.
- Open the Specification window of the Call Behavior Action, and click the cell of the Behavior property value. Then click up and, in the opened dialog, select the Behavior. Click **OK** when you are finished.
