## Selecting single property value from editable list

This is the case of assigning a value to a property in one of the following ways:

- Selecting a value either from a predefined value (auto-completion) list or from the whole model in the **Select Element** dialog.
- Creating an element and selecting it as property value.

To select a property value from a predefined (auto-completion) list

- 1. Click an appropriate property value cell.
- 2. Click the arrow (see the highlighted button in the following figure).
- 3. In the drop-down list, select a value.
