Merging property groups and subgroups

You can specify property groups and subgroups for different customization elements of the same element. That element will have groups and subgroups from all customization elements.

> ⓘ **Example**
>
> Let's say we have two customizations of the same element type, the actor. The first customization has the property group *My Group* with the subgroup *Subgroup 1* containing the property *Prop 1* . The second customization has the same property group with the same subgroup specified, but the subgroup *Subgroup 1* contains the property *Prop 2* .
>
> As a result, the actor element type will have *My Group,* with *Subgroup 1* containing both *Prop 1* and *Prop 2*.
