Hiding direction arrow on port shape

To hide the direction arrow on Proxy Port or Flow Port shape

1. Right-click the Proxy Port or Flow Port shape and select the **Symbol Properties**.
2. In the **Symbol Properties** dialog, set the **Show Port Direction** property value to *false*.
3. Click **Close**.
   The direction arrow is hidden on the selected port shape.

> The direction arrow of the Full Port shape is hidden by default. To display it, set the **Show Port Direction** property value to *true* in the **Symbol Properties** dialog.
