

Creating user and user groups

To create a new user account

1. From the left side users/user groups filter select **Users**.
2. In the lower right side of the Users application, click the action button  and select a **Create User** button.
3. In the **Create User** pane, fill in the required fields.

 A text box with a red asterisk (*) means that the information is mandatory. Thus, the **Create** button will be enabled only if you fill in the **Username**, **Password**, and **Confirm password** text boxes.

4. Click  on top right corner to save the user account.

Enable or disable user access

When creating a new user or editing user information, you may select to either enable or disable their access. If you want the user to access the TWCloud system and carry out the tasks assigned, select **Enable** (selected by default). If you clear the **Enable**, the user's status will be disabled and thus he or she cannot log into TWCloud Admin and TWCloud in the modeling tool.

The screenshot displays the 'Users' application interface. On the left, a sidebar shows 'Users (24)' selected, with sub-categories for 'Internal (18)' and 'External (6)'. Below this, 'User groups (4)' are listed, including 'Internal (2)' and 'External (2)'. The main area features a table of users with columns for 'Username' and 'Last activity date'. A red circle '1' highlights the 'Username' header. A red circle '2' highlights the bottom right corner of the table, which contains three action buttons: a plus icon, a minus icon, and a close icon. A red circle '3' highlights the plus icon button. To the right of the table, the 'Create user' pane is open. It contains several text input fields: 'Username *', 'Full name', 'Phone number', 'Email address', and 'Department'. Below these are two password fields: 'New password *' and 'Confirm password *'. At the bottom of the pane, there are two toggle switches: 'Enabled' (which is currently turned on) and 'Resource details preferred management' (which is currently turned off). A red circle '4' highlights the 'Enabled' toggle. A red circle '5' highlights the 'Resource details preferred management' toggle. A red circle '6' highlights the 'Create user' button at the bottom right of the pane.

After the user account is saved, the **User details** pane will be opened, here you can:

- Edit user details,
- [Assign roles](#),
- Assign a user to a group.

To create new user groups

1. From the left users/user groups filter select **User groups**.
2. In the lower right side of the Users application, click the action button  and Select a **Create user group** button, and in **Create user group** pane fill in the required fields.
3. Click  on the top right corner to save the user group.

After the user group is saved, the **Group details** pane will be opened, here you can:

- Edit group details,
- [Assign roles](#),
- Assign users to a group.
