Viewing history

History allows you to track changes made to the project. You can expand **History** and see all of the particular resource's versions, who committed them, and when. A commit will also include a description of the changes that tells you what has been changed in the resource.

Resource history card.

To view resource history

---

1. Navigate to the **Resources** application.
2. Click a resource name to open the **Resource** pane and find the **History** card.
3. You can expand the **History** section to see the resource information, including version, branch, commit, comment, and author.
