

Migrating to UML Profile for BPMN2 v1.0

The BPMN2 is supported by Cameo Business Modeler Plugin 17.0 and later versions of the tool; however, some further changes have been made in Cameo Business Modeler Plugin 19.0 to improve the UML Profile for BPMN2 v1.0 support. The migration comes with the changes listed below:

- Some BPMN elements have been renamed

Old Name	New Name
Message	BPMNMessage
Relationship	BPMNRelationship
BPMNImport	Import
Operation	BPMNOperation
Association	BPMNAssociation
EventGatewayType	EventBasedGatewayType
Event	BPMNEvent

- Some Stereotypes' metaclasses have been changed

Stereotype	Old Metaclass Name	New Metaclass Name
Resource	Actor, Class	Class
PartnerRole	Actor, Class	Class
ReceiveTask	OpaqueAction	AcceptEventAction
SendTask	OpaqueAction	CallOperationAction
ServiceTask	OpaqueAction	CallOperationAction
Task	OpaqueAction	Action
BPMNMessage	CentralBufferNode	Class
Message Flow	Dependency	Information Flow

Please check your model if you use Stereotypes for BPMN elements. They could have been affected by the migration.

- Some elements have been removed from the BPMN Profile

Removed Element
MessageFlowNode
Correlation
AttributeProperty
PinProperty
VariableProperty
