Uninstalling plugin

To uninstall a plugin

---

1. Start the modeling tool.
2. In the **Help** menu, select **Resource/Plugin Manager**.
3. In the **Resource/Plugin Manager** dialog, click to select the plugin.
4. Click the **Remove** button.
5. When you receive the message asking if you want to remove the plugin, click **OK**.
6. Restart the modeling tool.

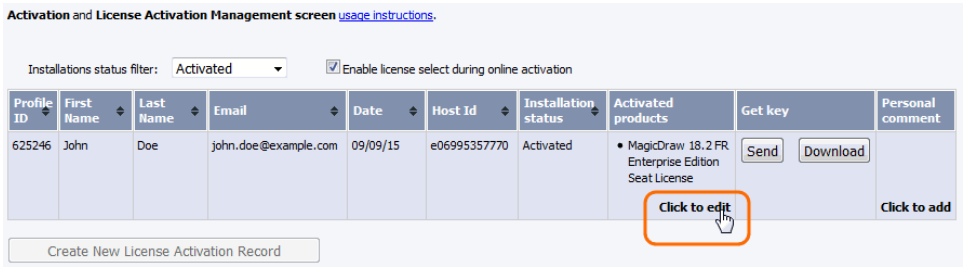

Deactivating license

Prerequisites

- You have the license owner account credentials.

Procedure

1. Log in at nomagic.com as a license owner.
2. At the right side of the webpage, under **Members**, click **License Activation Management**.
3. In the first table, all your activated products are listed. In the **Activated products** column, select the tool record to edit.

4. A new **Edit License Activation Record** window opens. Click the **Deactivate** tab.
5. Select the license you need and click **Deactivate selected**.
6. Your license is deactivated and the allowed rehost number decreased. Close or refresh the **License Activation Management** page.
