## Publishing project as web portal

Publish your project as interactive web portal and share it with stakeholders, including even those incapable of reading models in MagicDraw! The published web portal eliminates less needed elements from the model tree and proposes the most relevant views of enterprise architecture project, such as capability/strategic, operational, systems, services, standards, projects. This allows you to discover your project in a user-friendly and easily browsable environment.

If you want to publish a project as a web portal, you must install the Document Modeling Plugin. How to install plugins >>

You can also provide feedback on any element or diagram while reviewing an Enterprise Architecture Portal report of the project.

Use quick search to find elements and diagrams for viewing their custom contents and share this information with colleagues.

Publishing the project as a web portal is as easy as generating any report.

To publish a project

(!)

- 1. On the main menu, click Tools > Report Wizard.
- 2. Select one of the following templates:
  - DoDAF > DoDAF Web Report
  - MODAF > MODAF Web Report
  - NAF > NAF Web Report
  - NAF 4 > NAF 4.0 Web Report
- 3. Follow the steps of the Report Wizard.
- 4. Place the output in a shared directory or on web server to make it available for co-workers.

The following table introduces what you can expect in your web report. In every view of the report, you may find the following information:

- What elements are collected
- Collected element properties
- Related elements
- Related diagram types

Capability View – Enterprise Phases
