

Creating CV-3 diagram

When you choose to create CV-3 diagram, **CV-3 Creation Wizard** opens.

To create a CV-3 diagram from the wizard

1. Right-click the CV-3 Package and select **Create Diagram > CV-3 Capability Phasing**.
2. Follow the steps of the **CV-3 Creation Wizard**.
3. Click **Finish** when you are done.

If you do not wish to use the **CV-3 Creation Wizard** next time, clear the **Show the wizard next time, when I create CV-3** check box.

To create an CV-3 diagram manually when **CV-3 Creation Wizard** is disabled

1. Right-click the CV-3 Package and select **Create Diagram > CV-3 Capability Phasing**.
2. Type the diagram name.
3. Press Enter.
4. The blank CV-3 chart is created.

To restore the usage of the **CV-3 Creation Wizard**

1. Select **Options > Environment**.
2. In the **Environment Options** dialog select the **UPDM** options group.
3. In the General properties, set the **Show CV-3/StV-3/NCV-3 Creation Wizard each Time Creating New Chart** property value to *true*.
