

Opening DataHub Explorer

To open **DataHub Explorer**

1. Create a new MagicDraw® project or open an existing project.
2. From the MagicDraw main menu, click **Tools > DataHub > DataHub Explorer**. The [DataHub Explorer tab](#) opens.

Note

- Nodes under particular drivers in **DataHub Explorer** also represent nodes in the applications belonging to the drivers.

Related page

- If a driver is correctly started, the name of the driver will appear in the **DataHub Explorer** tree. The driver will then connect to data in each of its respective application.
