Importing the all-in-one plugin pack through Resource /Plugin Manager
You need to download the all-in-one plugin pack (the **.rdzip** file) first by doing the following
1. Log on at nomagic.com as a license owner.
2. From your download area, download the all-in-one plugin pack to the installation directory of the modeling tool.

You can install Cameo DataHub by importing the previously downloaded all-in-one plugin pack (the **.rdzip** file) through **Resource/Plugin Manager** or extracting the plugin pack manually in the modeling tool directory.

To install DataHub by importing the downloaded plugin pack through **Resource/Plugin Manager**

1. From the modeling tool main menu, click **Help** > **Resource/Plugin Manager**. The **Resource/Plugin Manager** dialog opens.
2. Click [Import] to browse the local file system to locate the plugin pack.
3. After importing the plugin pack, click [Close] to close the dialog.
4. Restart the modeling tool. The plugin installation will be completed after restarting the modeling tool.

> ⚠ **Note**
>
> - After the installation of DataHub, the DataHub menu items will not be enabled by default. They become enabled only when you open a new or existing project in the modeling tool.
>
> - The **Create OSLC query** [🔍] menu item is enabled after you add an IBM® Rational® DOORS® Next Generation Data Source.
