

Importing schema maps

You can import a schema map that is in the XML format to DataHub.

To import a saved schema map

1. Open the **Cameo DataHub Schema Map Manager** dialog and click

A rectangular button with a light gray background and a thin border, containing the text "Import..." in a dark gray font.

2. Select a schema file to import and click

A rectangular button with a light blue background and a thin border, containing the text "Open" in a dark blue font.
