

Setting diagram scaling size

When publishing a project to Cameo Collaborator, all diagrams with at least one edge bigger than 8000 pixels are automatically scaled down to this size while maintaining the aspect ratio. However it is possible to change the size diagrams are scaled to.

To change the diagram scaling size

1. Go to *<modeling tool installation directory>/bin* and open the properties file of your modeling tool.
2. Specify the *CollaboratorMaxCanvasMarginal* Java argument defining the diagram scaling size, e.g.:

```
-DCollaboratorMaxCanvasMarginal=10000
```

3. Save and close the file.
